
Duplex Air Compressors / Life Safety

The SEP 550 Duplex Air compressor should be used in conjunction with pre – action sprinkler systems for life safety applications.

Pre – action systems are most frequently used to protect against water discharge, or in large dry pipe systems, to speed up the reaction time.

The most common installations include computer rooms, libraries, and process control rooms.

Often a pre action system is specified to replace a gas based extinguishing system

- Complies with LPC guidelines
- All materials supplied comply with the (PED) 97/23/EC regulations
- Pressure tested prior to despatch

Technical Specification:

- SEP550/LPC or SEP400.OF/LPC
- Duplex Air Compressors
- Control panel, complete with alarms, trips, Indicators, for the automatic changeover and load sharing control of the compressors
- 25 Litre air receiver, with automatic drain
- All interconnecting pipe work and flexible hoses
- Unistrut mounting frame
- Full electrical wiring and pressure testing

Unit can be supplied with either standard or oil free / continuously rated motor.
