

Sale Engineering Products stock a full range of Grundfos pumps and accessories.

The wide range of CR / CRI / CRN pumps employ proven features and include extensive use of stainless steel for pump components, replacing cast iron, with resulting benefits in low rotating mass and smooth surfaces, providing higher pump efficiency and the benefit of resistance to corrosion.

Stainless steel vertical multistage pumps, suitable for a wide range of duties within water supply, pressure boosting and liquid transfer.

- WRc water bylaws approved
- Wide range of models covering flows up to 30 l/sec and heads up to 230 metres
- Stainless steel components for high efficiency and corrosion resistance
- Pressures up to 25 bars
- Space – saving vertical construction
- CRN – S / CRN – SF range available for high pressure applications

Jockey Pump Control

- Single & Three Phase Units
- 0.37 – 2.2 kw
- Direct on Line

Options

- Electronic On Delay Timer
- Supply Failure Switch

Please call our sales office for prices and technical information.

All technical drawings, performance curves and dimensional drawings are available upon request.
